EIT Urban Mobility will accelerate the transition to more liveable urban spaces

Drive systemic solutions that will:

- improve mobility AND
- create more liveable urban spaces

Bring together all key stakeholders in urban mobility

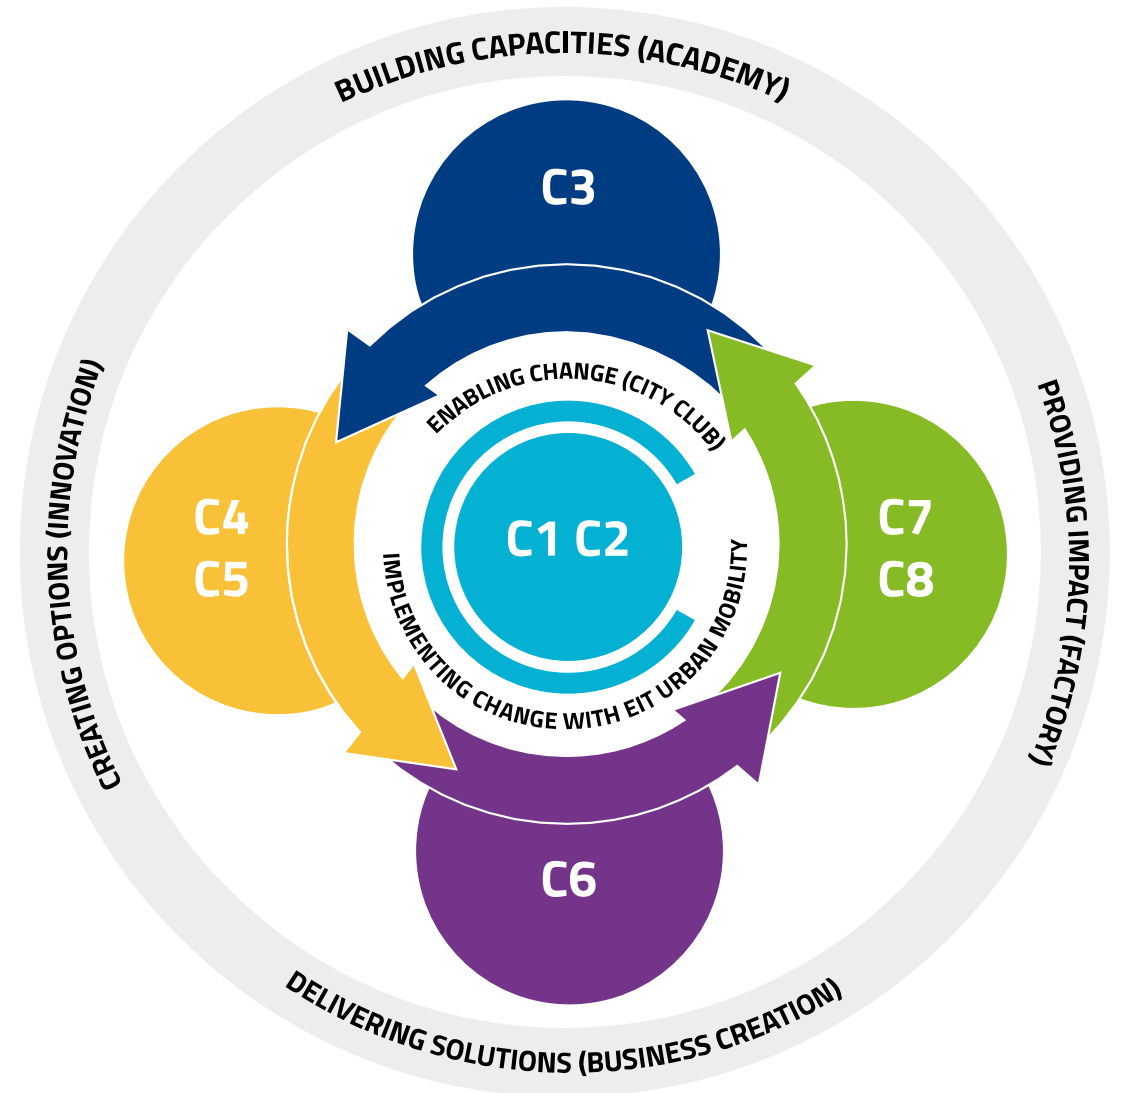

Ensure fast deployment & scaling to the cities of Europe and beyond

Stimulate behavioral change that benefits cities and all citizens

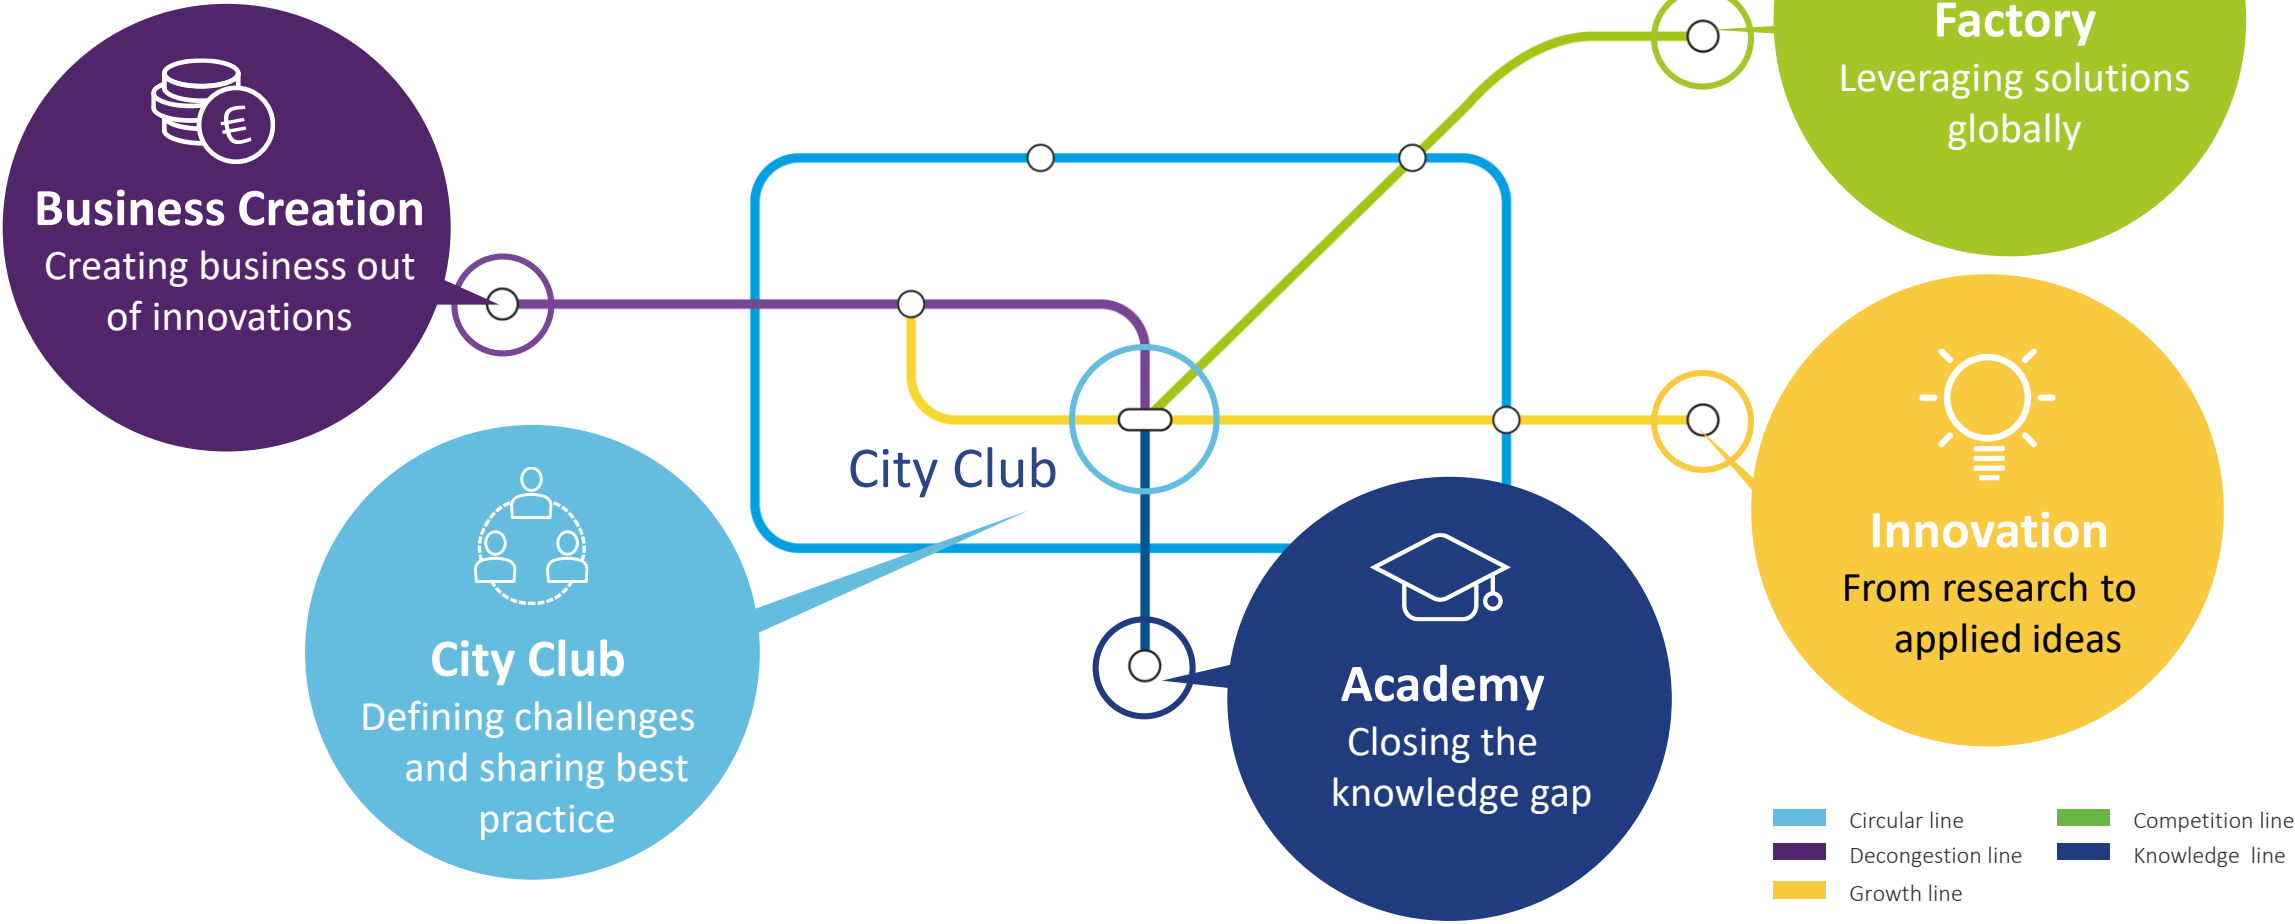

The EIT Urban Mobility challenges

- **C1**: Sustainable urban growth
- **C2**: Decongestion of our transportation network
- **C3**: Interdisciplinary talent
- **C4**: Eco-efficient and safe urban transport of people, goods and waste
- **C5**: Data exploitation
- **C6**: Increase the mobility industry competitiveness
- **C7**: Shaping the framework for regulatory and behavioral change
- **C8**: Urban governance

Systemic solutions require a highly integrated approach: **The EIT Urban Mobility map**
